

## PARTNER CERTIFICATE

This certificate recognises the CyberSecurity Centre of Excellence (CS-CoE) – Bangalore, India, as represented by Ravikishor Mundada as a partner of the Global Ecosystem of Ecosystems Partnership in Innovation and Cybersecurity (Global EPIC).

### CYBER SECURITY IS A GLOBAL CHALLENGE

*Cybersecurity threats are a global challenge that are disrupting local modern living. The scale and maliciousness of such threats continues to evolve largely unimpeded. That hardly a day goes by without news of yet another successful attack suggests our current approaches to cybersecurity are failing.*

*Global EPIC has been founded to enable the future securely through the development and sharing of new knowledge in the field of cyber security - leading to societal, economic and technological impact in a timely fashion. It will do this by building a global community of innovation ecosystems who will collaborate on projects and share expertise through an expanding network of diverse organisations.*

*Global EPIC will focus on both **co-creating globally** and **benefitting locally**. Underpinning this perspective is a conscious attempt to **glocalize** – localize the global and globalize the local.*

David Crozier  
President – Global EPIC
