

## Awareness Workshop on Cyber Privacy and Data Security

Date: Thursday, Jan 31, 2019

Time: 10:00 am to 4:30 pm, Venue: CSA 254, Dept. of CSA, IISc Campus, Bengaluru

Audience: Teachers / Professors of Engineering Colleges in Karnataka

### **Abstract:**

Educational institutes and academics ecosystems are currently going through the same churn of Cyber Security like rest of the industry segments. It's a fine balance between ensuring Cyber Safety & Digital Security while upholding the Individual/Personal Privacy. Usage of mobile communication technologies and digital science has benefited all within the ecosystem with power of speed, content generation, research, reachability and collaboration. Therefore, it is pertinent for the academic institutions to not only become aware of challenges and risks involved for leveraging these Digital Technologies and related use or abuse of data but also having a right policy at the organization level ensuring the critical information remains private.

CS-CoE together with its partner M/s Privacy Virtuoso is conducting this one day workshop specially aimed at the Target Audience of Engineering College Professors. And further continued learning through the ongoing CoE connects under the academic leadership of IISc supported by KSCST.

This one day event is our first stepping stone to bring the Academia – who are primary drivers of skill-capacity building - to become aware of the latest happenings around the globe in this space. Get to know from the relevant experts on specific Use Cases. Understand the best practices and standards being followed to draw a parallel reference for their own institutes for further building of robust Cyber Privacy & Security frameworks.
